## Basic and Intermediate Light Language

With Sandra Itenson Sweetman

Light Language is a powerful and universal usage of light and sacred geometry that has been practised in many areas for several centuries for healing and manifestation. These remarkable teachings are from an unbroken centuries old Mayan lineage and have been brought to the United States by Curandera Starr Fuentes. This is the first decade it has ever been taught outside of Mexico in this fashion. Sandra feels this work has really accelerated her personal growth and is honoured to share this knowledge with those who are ready.

Come join her and take your next spiritual step into the

profound world of Light Language

### Beginning Light Language

In this class you learn to recognize colour and geometry in your language, thoughts, and behaviour. Through this knowledge you can set grids for your own personal growth, a room, building or your home and office. Using these grids you consciously create intent that can result in instant and long-lasting changes in yourself and your environment!

### Intermediate Light Language

Continuing on this path of Light Language, the intermediate level teaches

you to write 49-shape grids to provide service to your community, create prosperity, improve or change your career, promote healthy relationships, heighten spiritual awareness, and step further onto the path of higher consciousness. In addition, you learn powerful grids for the healing of over 200 diseases. As you understand the causes of dis-ease or disharmony, your grids can transform them. And as a light worker accumulating knowledge of your own light, the energetic downloads from this class give you a leap on your own personal path.

Includes a 300 page manual.
